New Delhi – 110 092.

**Subject: - Advisory for release of electricity connection to charging stations for electric vehicles.**

Sir,

This has reference to release of electricity connection to the charging stations for electric vehicles. It was noticed that the charging stations are also installed in the basement of the commercial complexes for charging of vehicles besides storage of large number of batteries for battery swapping.

2. The distribution licensee is, therefore, advised to take necessary safety precautions for release of electricity connection. The distribution licensee may also advise the owner/ occupier of charging stations during the field inspection for release of electricity connection, to take proper safety precautions so as to avoid any untoward incidents of fire in these installations.

3. This issues with the approval of the Commission.

Yours faithfully,

Sd/-  
(U. K. Tyagi)  
Executive Director (Engg.)
