# 1. INTRODUCTION

## 1.1 NDMC Overview

New Delhi Municipal Council (NDMC) is a Municipal Council entrusted with the distribution of electricity to the consumers in the New Delhi area under Section 195 to 201 of the New Delhi Municipal Council Act 1994. The NDMC has the obligations of a Licensee under the Indian Electricity Act, 1910 in respect of the New Delhi Area.

Under Section 200 of the New Delhi Municipal Council Act 1994, NDMC has the powers to fix charges to be levied for the electricity supplied by it, subject to the provisions of any law for the time being in force.

Till 31st March, 2007, Delhi Transco Limited (DTL) was the sole entity responsible for the bulk procurement and bulk supply of power in Delhi. All the DISCOMs in Delhi had to purchase power from DTL at an approved Bulk Supply Tariff (BST) based on their capacity to pay. On 28th June, 2006, GoNCTD issued a set of Policy Directions for making power supply arrangements in Delhi from 1st April, 2007. These Policy Directions were issued under Section 108 of the Electricity Act 2003 (hereinafter referred to as the 'Act').

With effect from 1st April, 2007, the responsibility for arranging supply of power in Delhi for its own licensed area rests with the NDMC in accordance with the provisions of the Electricity Act 2003 and also the National Electricity Policy.

The business of bulk supply of electricity is no longer a part of the business of DTL, and the same is now vested with the NDMC & other Distribution Licensees (DISCOMs) of the State, w.e.f 1st April, 2007.

### 2.32 Return on Capital Employed

NDMC submits before the Hon'ble Commission that capital expenditure incurred by it for creation of assets has been majorly incurred through its budgetary support and internal accruals. It has not used any type of loan for creation of assets. NDMC has considered normative debt-equity ratio of 70:30 for calculating RoCE. The Rate of Return on Equity for the first control period is kept at 16% as per the DERC Wheeling and Retail Tariff Regulations, 2017. Rate of Return on the Debt is considered as 6.75% (MCLR on 1<sup>st</sup> April'2022 6.75%). Detailed calculation of Weighted average cost of capital (WACC) leading up to estimation of RoCE is shown in the table below:

### 3. Aggregate Revenue Requirement for FY 2024-25

The details of Aggregate Revenue Requirement for FY 2024-25 are worked out based on the following paras.

#### 3.1 Energy Sales

The DERC (Terms and Conditions for Determination of Tariff) Regulations, 2017 stipulates the Sales projections to be made as follows;

"5...

*Sales Forecast for each consumer category and sub-categories based on following factors:*

- a) Category wise growth in No. of Consumers,*
- b) Category wise growth in Sanctioned Load / Contract Demand (MW),*
- c) Economic Cycle (boom, recession, Government policies etc.),*
- d) Impact of Open Access (MU), Net Metering (MU), Demand Side Management measures (MU) etc.,*
- e) Any other factor impacting the sales;"*

The Petitioner has forecasted sales to each consumer category and sub-categories for FY 2024-25 based on the following assumptions and on the basis of the above Clause in the Tariff Regulations.

For projecting energy sales for various category and sub-categories for FY 2024-25, past trends have not been used. The Petitioner has computed the CAGR of last 3 years and 5 years considering FY 2018-19 as the base year. The CAGR of last 3 years, 5 years, YoY growth rate is as per table given below:

**Table 37 Category-wise Growth of Sale of Energy (MU) from FY 2018-19 to FY 2022-23**

S. No	Consumer Category	5-Yr CAGR 2018-2023	3-Yr CAGR 2020-2023	1-Yr CAGR 2022-23
1	Domestic	8.46%	-0.83%	6.08%
2	Non-Domestic	-15.10%	-15.43%	10.96%

8	JJ Cluster (Flat Rate)		5.86%	
9	Grand Total	-11.91%	-13.21%	9.29%

From the above table it has been observed that there is no consistency in sales growth rate due to reasons

like demolition of Government colonies, Corona Pandemic in the year 2020 & 2021 etc. Therefore, petitioner has projected category wise sales for FY 2024-25 based on existing customers & connected load and reconstruction of new commercial and residential complexes anticipated of demolished Government colonies like Naoroji Nagar, Sarojini Nagar etc.

Accordingly, the petitioner has projected sales for FY 2024-25 to the tune of 1,326.91 MU.

### 3.3 Collection Efficiency

The DERC (Terms and Conditions for Determination of Tariff) Regulations, 2017 stipulates the Sales

projections to be made as follows;

"5...

*(11) Collection Efficiency shall be measured as ratio of total revenue realized to the total revenue billed in the same year:*

*Provided that Revenue Realized or Revenue Billed on account of electricity duty, late payment surcharge, any other surcharge shall be excluded from the computation of Collection Efficiency;"*

The Petitioner has considered 99.80% collection efficiency for FY 2024-25 as per DERC Business Plan Regulation, 2023 and the same has been considered for estimation of Distribution Losses also.

### 3.4 Distribution Loss

The DERC (Terms and Conditions for Determination of Tariff) Regulations, 2017 stipulates the Sales projections to be made as follows;

"5...

*(8) Distribution Loss & Collection Efficiency trajectory consisting of:*

*(a) Total and Voltage-wise distribution losses (%) along with the basis thereof,*

*(b) Total and category-wise revenue collection,*

*(c) AT&C loss level based upon past trends, sales growth and any other factors;*

...

*(12) Distribution Loss shall be measured as the difference between the Energy units input into the distribution system for sale to all its consumer(s) and the total Energy units billed in its Licensed area in the same years;*

In DERC Business Plan Regulations, 2023 distribution loss of 7.54% is specified for FY 2024-25. Accordingly, the distribution loss has been considered as 7.54% in table below;

**Table 40 Distribution Loss for FY 2024-25**

S. No.	Particulars	Projected FY 2024-25
1	Distribution Loss (%)	7.54%

### 3.5 Energy Requirement

Based on the projected Energy Sales and Distribution Loss for FY 2024-25, the energy requirement for NDMC is projected as under;

  
RADHA KRISHAN, CSS  
DIRECTOR (Estate-I&II/PR) / Power  
New Delhi Municipal Council

2	Distribution Loss (%)	7.54%
3	Distribution Loss (MU)	108.21
4	Energy Required at Distribution Periphery (MU)	1,435.12

### 3.6 AT&C Loss

The DERC Tariff Regulations, 2017 specifies

*"(9) The A T&C Loss shall be the relationship between Distribution Loss and Collection Efficiency computed as per the following formula:*

*A T&C Loss = [1 - (1 - Distribution Loss) \* Collection Efficiency]] \* 100 where, A T&C Loss, Distribution Loss and Collection Efficiency are in (%) percentages"*

NDMC submits its AT&C Loss as calculated from considered annual distribution loss and collection efficiency for the period FY 2024-25 in table below:

**Table 42 AT&C Loss for FY 2024-25**

S. No.	Particulars	Projected FY 2024-25
1	Distribution Loss (%)	7.54%
2	Collection Efficiency (%)	99.80%
3	AT&C Loss (%)	7.72%

### 3.7 Energy Availability

NDMC will meet the proposed energy requirement from various sources namely.

Procurement of electricity from plants situated in Delhi – specifically, Pragati Power Station-I and Pragati Power Station-III (Bawana) by Delhi (MSW) Solutions Ltd., aligning with the assigned allotments. Forecasts for power generation within these local plants are derived from historical patterns. Notably, during the fiscal year 2022-23, there was a sudden surge in coal prices due to increased rates for imported coal, while the same trend has been continue for FY 2023-24, thus, power purchase cost for these plants have been computed based on the actual rates reported during FY 2022-23.

Furthermore, apart from the previously mentioned details, the NDMC has entered into a Power Purchase Agreement (PPA) for a 236 MW power allocation under SHAKTI B (v) across several plants. This power procurement is anticipated from these plants throughout the fiscal year 2024-25. To calculate the power from these specific plants, their actual average Plant Load Factor (PLF) over the last two years has been taken into account. The plants included in the aforementioned power procurement are listed in the table below:

Station	Power Allocation (MW)	Rate (Rs./kWh)	Energy (MU)	Amount (Rs. Crore)
Jindal India Thermal Power Limited	30.30	5.14	187.09	96.16
RKM Powergen Pvt Ltd	45.45	5.49	182.80	100.36
DB Power Ltd.	15.15	5.20	97.44	50.67
SKS Power Generation Chhattisgarh Limited	15.15	5.20	35.74	18.59
TRN Energy Private Limited	15.15	5.20	36.88	19.19
Jindal Power Limited	45.45	5.22	50.51	26.37
MB Power Madhya Pradesh Ltd	24.28	5.28	145.61	76.88
RKM Powergen Pvt Ltd	45.45	5.40	182.80	98.71
<b>Total</b>	<b>236.38</b>	<b>5.30</b>	<b>918.88</b>	<b>486.92</b>

The petitioner emphasizes their ample availability of power from sustainable sources and is actively engaged in securing clean and eco-friendly energy for their licensed area. The NDMC (New Delhi Municipal Council) earnestly expresses its commitment to procuring power exclusively from renewable sources to satisfy its energy needs. Therefore, a plea is made to the esteemed Commission to abstain from considering any power allocation from alternative sources in the upcoming years.

Nevertheless, if the Commission deems it necessary to allocate additional capacity to NDMC, it is suggested that such allocation be sourced from available hydro and solar resources designated for Delhi's power distribution companies, in collaboration with NDMC. The allocation of NDMC's power sourcing from various power stations is detailed in the table below.

**Table 43 Energy Availability Projections (NDMC Share) for FY 2024-25**

S. No.	Particulars	Total installed Capacity (MW)	Firm % Share FY 2024-25	Capacity in MW	Energy in MU

7	Bilateral, Hydro & Others	50	100.00%	50.00	30.06
	<b>Total</b>			<b>491.96</b>	<b>1,488.26</b>

For meeting the supply-demand gap during the peak hours, NDMC projects to rely upon short-term, bilateral and Inter-Discom power purchase. Detailed methodology of projecting the power availability from various sources is detailed below;

Energy availability has shown a substantial rise over the years, and this has helped NDMC meet its peak power requirements comfortably. NDMC has considered the availability of power from such sources in

the past and has accordingly worked out the expected availability from such stations for FY 2024-25. The overall estimated quantum of power to be purchased from each of the sources is provided in the above table and appropriate forms and the same may kindly be approved by the Hon'ble Commission.

Presently, NDMC didn't envisages any shortfall in power. Further, NDMC has allocations from Delhi MSW Solutions Ltd. Bawana and Tehkhand Waste to Electricity Project Limited, New Delhi, in line with the provisions of Tariff Policy, 2016 which mandates all DISCOMs to procure power from municipal solid waste-based power plants at a tariff determined by the appropriate Commission. NDMC also submits that it may resort to other Banking and bilateral arrangements along with Short-term power sources to meet the energy deficit as and when required.

### 3.8 Renewable Purchase Obligation (RPO)

The DERC has notified;

"4

*(1) Every Obligated Entity shall purchase electricity from Renewable Energy Sources for fulfillment of a defined minimum percentage of the total consumption during the year, under the Renewable Purchase Obligation, as specified below;*

S. No.	RPO Targets	FY 2023-24	FY 2024-25	FY 2025-26
1	Wind RPO	1.60%	2.46%	3.36%
2	Other RPO	24.81%	26.37%	28.17%
3	HPO Target (only for Distribution Licensee)	0.66%	1.08%	1.48%
4	<b>Total RPO Target</b>	<b>27.07%</b>	<b>29.91%</b>	<b>33.01%</b>

*Provided further that the targets specified for Obligated Entities for FY 2025-26 shall be continued beyond FY 2025-26 unless specified by the Commission separately."*

....

NDMC has projected RPO from various sources including Solar Projects, Hydro Projects, Wind Projects, and Waste to Energy Projects which would be sufficient to meet the existing RPO targets specified by the Hon'ble Commission and hence NDMC has not projected any REC purchase in FY 2024-25.

Wind RPO Obligation: as per Business Plan Regulation, 2023, NDMC envisages procurement of wind power from Wind Power Projects (WPPs) commissioned after 31<sup>st</sup> March 2022 and the Wind Energy consumed over and above 7% from WPPs commissioned till 31<sup>st</sup> March 2022.

Hydro RPO Obligation: as per Business Plan Regulation, 2023, NDMC envisages procurement from Hydro Power Projects commissioned after 8<sup>th</sup> March 2019.

Other RPO Obligation: NDMC envisages procurement of solar power from various sources within its licensed area through Plants installed by NDMC on ownership basis, through Developer Mode and Net-Metering/Grid connected. It plans to procure incremental solar power in the year FY 2024-25 from such sources. NDMC submits that it is making efforts to purchase more solar power through competitive bidding. The same is likely to increase the solar purchase in its power procurement portfolio. NDMC has planned to purchase power from various other sources including Hydro Projects, Delhi MSW Solutions

Ltd. And Tehkhand Waste to Electricity Project Limited, New Delhi and through IEX (in GTAM & GDAM category), which would be sufficient to meet the existing RPO targets specified by the Hon'ble Commission and hence NDMC has not projected any REC purchase in FY 2024-25.

### 3.15 Gross Fixed Assets (GFA)

NDMC is set to embark on crucial infrastructure development initiatives under Phase-I of the Restructured Distribution System Strengthening (RDSS) program sanctioned by the Government of India. This includes the replacement of 11kV panels and associated works, an investment anticipated to reach Rs. 100 Crore in the fiscal year 2024-25.

Furthermore, NDMC seeks to engage a Project Management Agency (PMA) to provide consultancy services supporting the implementation of Smart System Metering (DT and Feeder Metering) and Loss Reduction Infrastructure works within Phase-I of RDSS, amounting to an expected expenditure of Rs. 100 Crore during FY 2024-25. In parallel, the appointment of an Advanced Metering Infrastructure (AMI) Service Provider is envisioned on a Design-Build-Finance-Own-Operate-Transfer (DBFOOT) basis, along with the deployment of SCADA/DMS systems for RDSS initiatives in NDMC. An estimated Rs. 60 Crore will be allocated for these endeavors in the same fiscal year.

Regarding funding, NDMC intends to allocate resources in a manner where 60% of the anticipated expenditure for RDSS will be covered by the Ministry of Power, while the remaining 40% will be sourced from NDMC's own funds. Consequently, NDMC is looking to commit approximately Rs. 64 Crore towards the implementation of RDSS within its area.

Taking into account the overall financial plan for FY 2024-25, NDMC proposes an aggregate expenditure of Rs. 212 Crore. This encompasses the previously approved amount of Rs. 148 Crore as sanctioned by the Hon'ble Commission in its Business Plan regulation for 2023.

NDMC respectfully requests the Hon'ble Commission to review and approve the proposed expenditure plan for FY 2024-25, considering the critical importance of these infrastructure developments to the council's objectives and the broader enhancement of the distribution system in NDMC's jurisdiction.

The Gross Fixed Assets for FY 2024-25 computed is as under:

The existing tariff applicable during FY 2024-25 would generate revenue of Rs. 1,262.09 Crore. The recovery of the gap may require in appropriate hike in tariff for which the Hon'ble Commission may take decision.

As NDMC has participated in RDSS, it is requested than no Regulatory Assets be created for the gap in the ARR and ACS and this is the precondition of the RDSS.
